PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Acc. L17-427-1 #85368

Sample D8 GSC Cart

| Sample ID SD230725-002 (81590) | | Matrix Concentrate (Inhalable Cannabis Good) |
|--------------------------------|-----------------------|--|
| Tested for The Colony Group | | |
| Sampled - | Received Jul 24, 2023 | Reported Jul 27, 2023 |
| Analyses everyted CANI | | |

Laboratory note: The estimated concentration of the unknown peak in the sample is 252% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or 49-THC or 49-THC at this time there are no reference standards available for (+)d8-THC (+)d8-THC is a different compound from the main (+)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC are an accordance of the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compounds may have different efficacies. Using the most advanced instruments and the compound of the compounds may have different efficacies. Using the most advanced instruments and the compound of the compound

CAN+ - Cannabinoids Analysis

Analyzed Jul 27, 2023 | Instrument HPLC-VWD | Method SOP-001
The expanded Uncertainty of the Cannabinoid analysis is approximately \$\mathcal{I}\$.806% at the 95% Confidence Level

| Analyte | LOD mg/g | LOQ mg/g | Result % | Result mg/g |
|--|-------------|-------------|-------------|----------------|
| Cannabidivarin (CBDV) | 0.039 | 0.16 | ND | ND |
| Cannabidiolic Acid (CBDA) | 0.001 | 0.16 | ND | ND |
